High precision automatic Jelly labeling machine

Easy to use, simple to operate, no pinching of products

High folding accuracy Label easy to tear Save four times the labor

Jelly automatic labeling machine

Time saving / labor saving / worry

Fast induction Smooth and stable higher efficiency

Features

Information advances
efficiency means saving money

Ingenuity and quality, born for efficiency

1. Improve product labeling and film sticking efficiency, accurate sticking position, good quality and high stability
2. Reasonable mechanical structure design ensures smooth and stable label delivery
3. Setting and running related parameter values can be directly displayed and operated on the display
4. The label electric eye quickly senses the label gap to complete the label and complete the identification

Product parameters

Air pressure	4-6Kg/cm²
Total Weight	About 50Kg
power supply	220V/50Hz
speed	900-1200PCS/H
Dimensions	650*400*450mm
Label specifications	Length: 40-130mm Width: 10-50mm (Can be customized according to product size)
Label roll specifications	Inner diameter: 76mm Outer diameter: Max240mm (Can be customized according to product size)
Product labeling outer diameter	Customized according to product size

Processing sample display

This machine is a brand new half-folding labeling machine developed for the special-shaped labeling position (such as frozen, lollipop, round stick, etc.). Easy to use, simple to operate, no pinching of the product, high accuracy of label alignment

Product display

Jelly labeling machine

Cost-effective, smarter, labor-saving, stable, and controllable
