WPM-680B

Model No. WPM-680B

SPECIFICATIONS

	1-50
	0.14-1.33
	,
	AC220V
	480 * 350 * 320

[illegible](LWH)	480350320 [illegible]
[illegible]	1-50mm
Wire Size	0.14-1.33mm
Adjust Method	Desktop, Electric
Mounting	Fixed on Tabletop
Lead-Wire Type	Single or Multiple
[illegible]	AC220V
[illegible]	Electronic Stepless Speed Regulator
Key Components	Motor, Paint-Stripping Blade, Microswitch
[illegible]	Electrical, Electronics, Instrumentation, Transformers, Household Appliances, Electric Tools, Coil Manufacturing & Maintenance

The **Enameled Wire Stripping Machine** is essential for a wide range of industries and applications that require the preparation of enameled copper wires, including:

- **Electrical Industry:** Preparing enameled wires for motor windings, transformer coils, and electrical component manufacturing.
- **Electronics Industry:** Stripping enameled wires for circuit board assembly, electronic device wiring, and component connection.

- **Instrumentation Industry:** Preparing fine enameled wires for sensitive measuring instruments and sensors.
- **Transformer Manufacturing and Repair:** Stripping enameled wires for transformer coil production and maintenance.
- **Household Appliance Manufacturing:** Preparing enameled wires for internal wiring and motors within appliances.
- **Electric Tool Manufacturing and Repair:** Processing enameled wires for motors and components in power tools.
- **Coil Manufacturing:** High-volume stripping of enameled wires for various coil types and applications.

Invest in the **Enameled Wire Stripping Machine** and experience a significant upgrade in your enameled wire preparation efficiency, precision, and ease of use. This robust and user-friendly desktop machine is designed to streamline your operations, reduce labor costs, and deliver consistently superior stripping results. Contact us today to learn more and request a personalized quote to revolutionize your enameled wire processing workflow!

Measurement: 480*350*320mm
